

**Air Compressors and Accessories**

- Reciprocating Compressors
- Fixed Speed Rotary Screw
- Variable Speed Rotary Screw
- Oil-Free Rotary Screw
- Rotary Vane
- Refrigerated and Desiccant Dryers
- Nitrogen Generators
- Filters
- Lubricants
- Piping
- Oil/Water Separators
- Air Tanks

**Field Services**

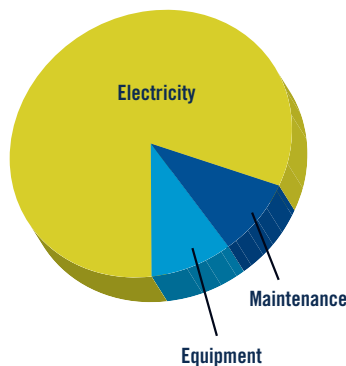

- 24 Hour Service
- Repair all Major Brands and Sizes
- Factory Certified Technicians
- Large Parts Inventory
- Pick-up and Delivery Service
- Custom Piping/Installation
- Preventive Maintenance Agreements
- Rentals by the Day, Week, or Month
- Compressed Air System Audits
- Vibration Analysis

**Did you know?**

A 150hp compressor running 6,000 hours/year with an electrical rate of \$0.10/kWh would cost over \$500,000 during a 10-year span. With electricity costs accounting for over 80% of life cycle costs, a variable speed air compressor would be ideal for your energy saving efforts.

Green initiatives are important to us. We'll help your business save energy, reduce your carbon footprint, and conserve resources.

10-Year Life Cycle Cost at \$0.10/kWh
